Part B. CV SUMMARY (max. 5000 characters, including spaces)

Bachelor's Degree in Hispanic Philology (1995) and Linguistics (1997) and PhD in Linguistics (2002). University Professor of General Linguistics at the University of Cadiz. My interest in the neurocognitive aspects involved in language processing and clinical linguistics constitutes one of the main axes of my research. Thus, especially over the last decade, I have addressed some of the most current challenges of Psycholinguistics and Neurolinguistics, such as lexical relations and their connection with the mental mechanisms that support them, the various phenomena and phases of language production and comprehension, language disorders and the mental and cerebral configuration of lexical meaning. Closely related, I have recently leaded the Excellence Project (Consolidated Challenge) "Longitudinal psycholinguistic study of children with low prevalence chromosomopathies", funded by the Andalusian Plan for Research, Development and Innovation (2020-23). My scientific production includes more than seventy publications, including books, book chapters and contributions in scientific journals, most of them top level, as many of these journals are indexed in the first quartiles of SJR, JCR or FECYT and the publishers occupy the first or second quartile of the corresponding SPI indicator for the specialities of "Linguistics, Literature, Philology". In addition to their indexing in databases or presence in national and international catalogues, these publications have numerous quality indicators such as citations and reviews in top-level publications, previous

anonymous peer review, or the prestige of the editor or publisher and of the international scientific committees involved. The quality and dissemination of such research activity is evidenced by the recognition of a period of 24 years of research activity, evaluated by CNEAI in accordance with RD 1086789 (the latest, corresponding to the period 2017-2022) and the maximum number of regional research complements (five) of the Andalusian Research Plan. Member of the research group of excellence "Semaínein" (maximum score in all PAI calls), which has obtained different awards for its relevant research career and social and business transfer and has recently been selected as one of the scientific milestones of the 40 years of the University of Cádiz. Likewise, in terms of research activity within the framework of this group, the participation in numerous research projects obtained in competitive public calls (as principal investigator in three) and transfer contracts (as principal investigator in five) with different entities and institutions is noteworthy. These activities have led to the awarding of various research prizes and recognised academic distinctions. On the other hand, I am or have been a member of other national and international research teams in charge of carrying out projects such as the "Red de Observatorios de Neología del Castellano" (NEOROC), the "Semantics and Lexicon group" (SEMyLÉX Group), the Project for the "Estudio Sociolingüístico del Español de España y América" (PRESEEA), the Project "Disponibilidad Léxica en Escolares del Mundo Hispánico", and the international cooperation project "COFFEE" (561812-EPP-1-2015-1-FR-EPPKA2-CBHE-SP). But above all, as an example of research management, it is worth highlighting my participation as a member of the Promoter Commission of the University Research Institute of Applied Linguistics (ILA) and as its secretary, since 18 November 2014, as well as being a member of the Permanent Commission, since its approval by the Institute Council on 12 January 2016, and coordinator of the Laboratory of Experimental Linguistics. In addition to my scientific production, I have presented at more than forty national and international conferences, many of them held outside Spain (universities of Leipzig, Roma Tre, Heidelberg, Roma La Sapienza, Catholic University of Leuven, Lyon, King's College London, Hebrew University of Jerusalem, Zürich, Genoa, Pavia, Graz and Neuchâtel) and the presentation of invited lectures and papers at various relevant scientific events, as well as funded mobility stays in prestigious centres (Universities of Cambridge, Free University of Berlin, Catholic of Leuven, Polytechnic of Valencia, Valencia and IUSS Pavia). In terms of scientific responsibility, I have participated or been responsible for the organisation of various prestigious scientific events and I am a member, since 2004, of the Editorial Board of the journals *Pragmalingüística* (with FECYT quality seal since 2014 and positioned in C1 in FECYT rankings of 2019, 2020 and 2021), and, since 2018, of the Editorial Board of the *Estudios de lingüística aplicada* Collection (CEA-APQ seal of quality in academic publishing), published by the Universitat Politècnica de València. I am responsible for research contracts and grants and member of the Scientific Council of the Spanish Association of Applied Linguistics (AESLA), together with a regular activity of evaluation of articles for journals of recognised quality.
